

## About CADENAS GmbH

Since 1992, CADENAS has stood for innovation, success and creativity. As an independent software provider, CADENAS develops customized solutions for the manufacturing industry.

In particular with the display of 3D CAD geometries, CADENAS has set the benchmark in mechanical engineering and plant construction.

Together with component suppliers, CADENAS creates CAD data that are then made available to component buyers in the form of electronic product catalogs.

The CAD data is accessible both via the online portal PART-community, as well as via the Strategic Parts Management System PARTsolutions.
